

Lab 4. Design and implement a University Accommodation Database (Part 2)

Task 1

For the Relational Database you have created in Lab 3 (University Accommodation Database), now **add** the following data requirements into your database design (EER diagram) and **implement** them in MySQL:

Student flat inspections

Student flats are inspected by staff on a regular basis to ensure that the accommodation is well maintained. The information recorded for each inspection is the name of the member of staff who carried out the inspection, the date of inspection, an indication of whether the property was found to be in a satisfactory condition (yes or no), and any additional comments.

Accommodation staff

Some information is also held on members of staff of the Accommodation Office and includes the staff number, name (first and last name), home address (street, city, postcode), date of birth, sex, position (for example, Hall Manager, Administrative Assistant, Cleaner) and location (for example, Accommodation Office or Hall).

You need to **insert at least five rows** of data to the relations created for the above requirements.

Task 2

Using **INSERT** statement, **insert the following data** into your University Accommodation Database:

1. A new student whose name is the same as your own name, with student number S356, unknown date of birth and sex, nationality of China, no special need, currently on a waiting list, unknown course.
2. A new contract of student San Zhang, made on 1st September 2020, contract number of 101089, contract period is 3 semesters, room allocated for the contract is S310, moving in date is 5th September 2020, and unknown moving out date.
3. A new invoice for contract 103523, issued on 5th February 2020, invoice number 1108645819, first reminder date is 20th February 2020, second reminder date is 25th February 2020, and the invoice is currently unpaid.

Task 3

Formulate the following queries in MySQL:

- a. Present a report listing the names and student numbers of students with the details of their contracts, order by student surname.
- b. Display the details of contracts that include the Summer Semester.
- c. Display the total rent paid by John Doe.
- d. Display the details of flat inspections where the property was found to be in an unsatisfactory condition.
- e. Present a report of the names and student numbers of students with their room number and place number in Hall Gryffindor.
- f. Display the minimum, maximum, and average monthly rent for rooms of each hall of residence, order by hall names.
- g. Produce a report of unpaid invoices.
- h. List the students whose payment method is cash.
- i. What's the total income from all paid invoices so far for the academic year September 2019- August 2020?
- j. Present a report of students that have paid their invoices within 10 days of the invoice being issues.
