EBU6501 Middleware
Week 3 Quiz – Group 2

Answer ALL Questions

Download this file, Circle the Correct Answers and Submit when You Finish

Time: 15 Minutes

Total Questions: 15

Total Mark: 15

Question 1

A[ache Kafka can organise data using what feature?

A. Partition
B. Replication
C. Topic
D. KafkaProducer Java class

Question 2

Kafka can convert Event key/values from internal to external data types using:

A. Partitions
B. Serialisation and deserialisation
C. Replication
D. KafkaConsumer Java class

Question 3

UDP protocol is good for what:

A. Transporting music, pictures and diagrams
B. Bank transactions
C. Transporting data that needs hugh security
D. Transporting data that needs high accuracy

Question 4

Which of the following is a constrained IoT protocol?

A. HTTPS
B. HTTP
C. TCP
D. Bluetooth

Question 5

API programmers are also called:

A. Application Process programmers
B. Application Progress programmers
C. Middleware programmers
D. Web programmers

Question 6

Bitcoin uses:

A. Peer-to-peer network
B. Centralised network
C. Only LAN
D. Only WAN

Question 7

Which of the following is a constrained IoT protocol used at home and buildings?

A. Zigbee
B. HTTP
C. SSH
D. REST

Question 8

Which statement is correct about HTTP?

A. It is used at layer 4 of OSI model
B. It is IoT protol for constrained devices
C. It is used at the layer 2 of the OSI model
D. It is not secure

Question 9

What is DoS?

A. It denies users access to services from single source
B. It denies users access to services from multiple sources
C. It destroys your data
