EBU01 2022/23 Internet Protocols

Exit

Lecturer: Richard Clegg r.clegg@qmul.ac.uk
Xianhui Che x.che@qmul.ac.uk

Credits: 2.5

Exam: 2.5h close-book exam

Summary:

This course examines the TCP/IP protocol suite from OSI layers 1 through to 4. Particular emphasis is placed on CSMA/CD LAN operation, Internet Protocol including Addressing, Routing and Subnetting and Transmission Control Protocol.

Aims:

The aim is to provide an in-depth knowledge of contemporary and widely-deployed Internet Protocols, providing the student with an insight into their functionality and inter-relationship.

Learning Outcomes in Subject Specific Skills:

At the end of this module students will be able to:

· Explain the protocols that provide the Internet infrastructure, their role, how they operate and a number of implementation details.

· Design simple network architectures.
