EBU6304 Software Engineering

Tutorial 1

Concept Maps

- A concept map is a diagram that depicts suggested relationships between concepts. (-Wikipedia).
  - Visually depict a system of relationships
  - Help you put knowledge together
  - Demonstrate your understanding

Using Concept Maps in Software Engineering Study

- The Software Engineering subject has many concepts.
- Drawing a concept map for each topic can help you understand it better and consolidate your knowledge.

Concept Maps Tool

- You can simply draw concept maps using pen and paper, but it is difficult to move around or make changes.
- Using a good tool can effectively create concept maps.

Concept Maps Tool

- Many concept map tools are available
  - Cmap: https://cmap.ihmc.us/

  We use Cmap in all of our examples

  - MindMeister: https://www.mindmeister.com/
  - Lucidchart: https://www.lucidchart.com/mind-maps
  - Mindmup: https://www.mindmup.com/

Concept Map example

- Topic: Software

1. Identify concepts
2. Add links to show the relationship

Concept Map example

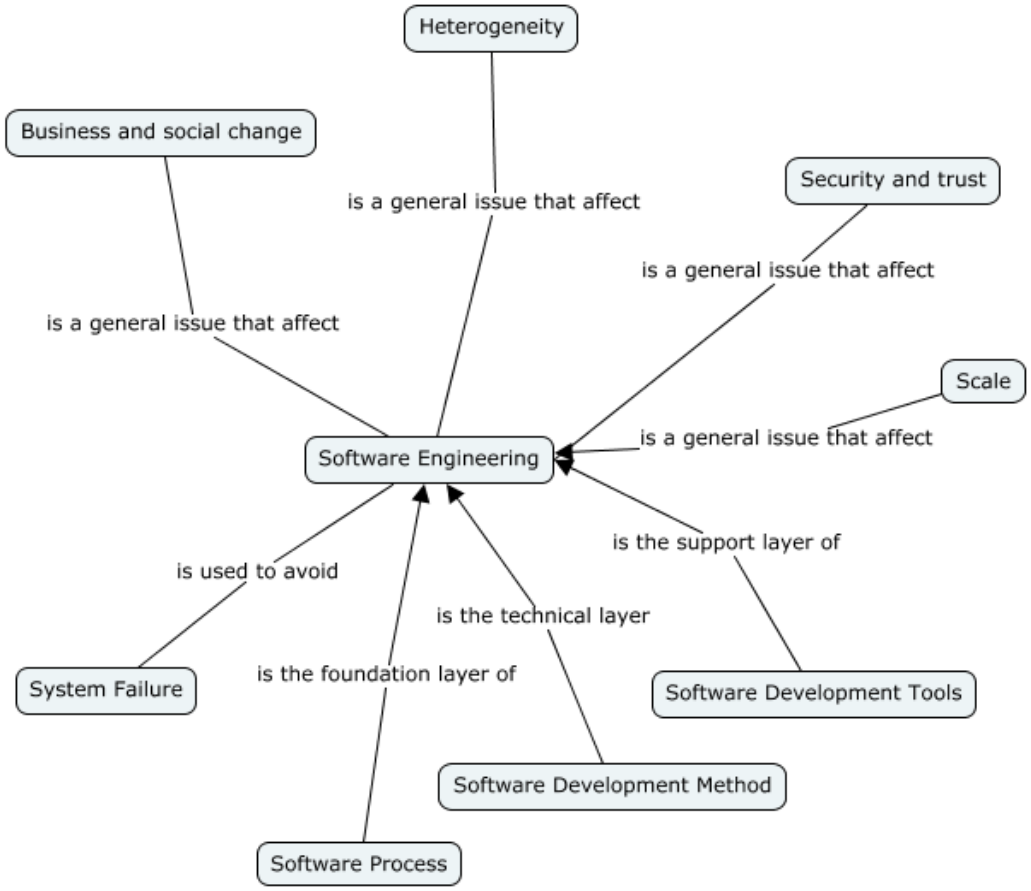

Concept Map example

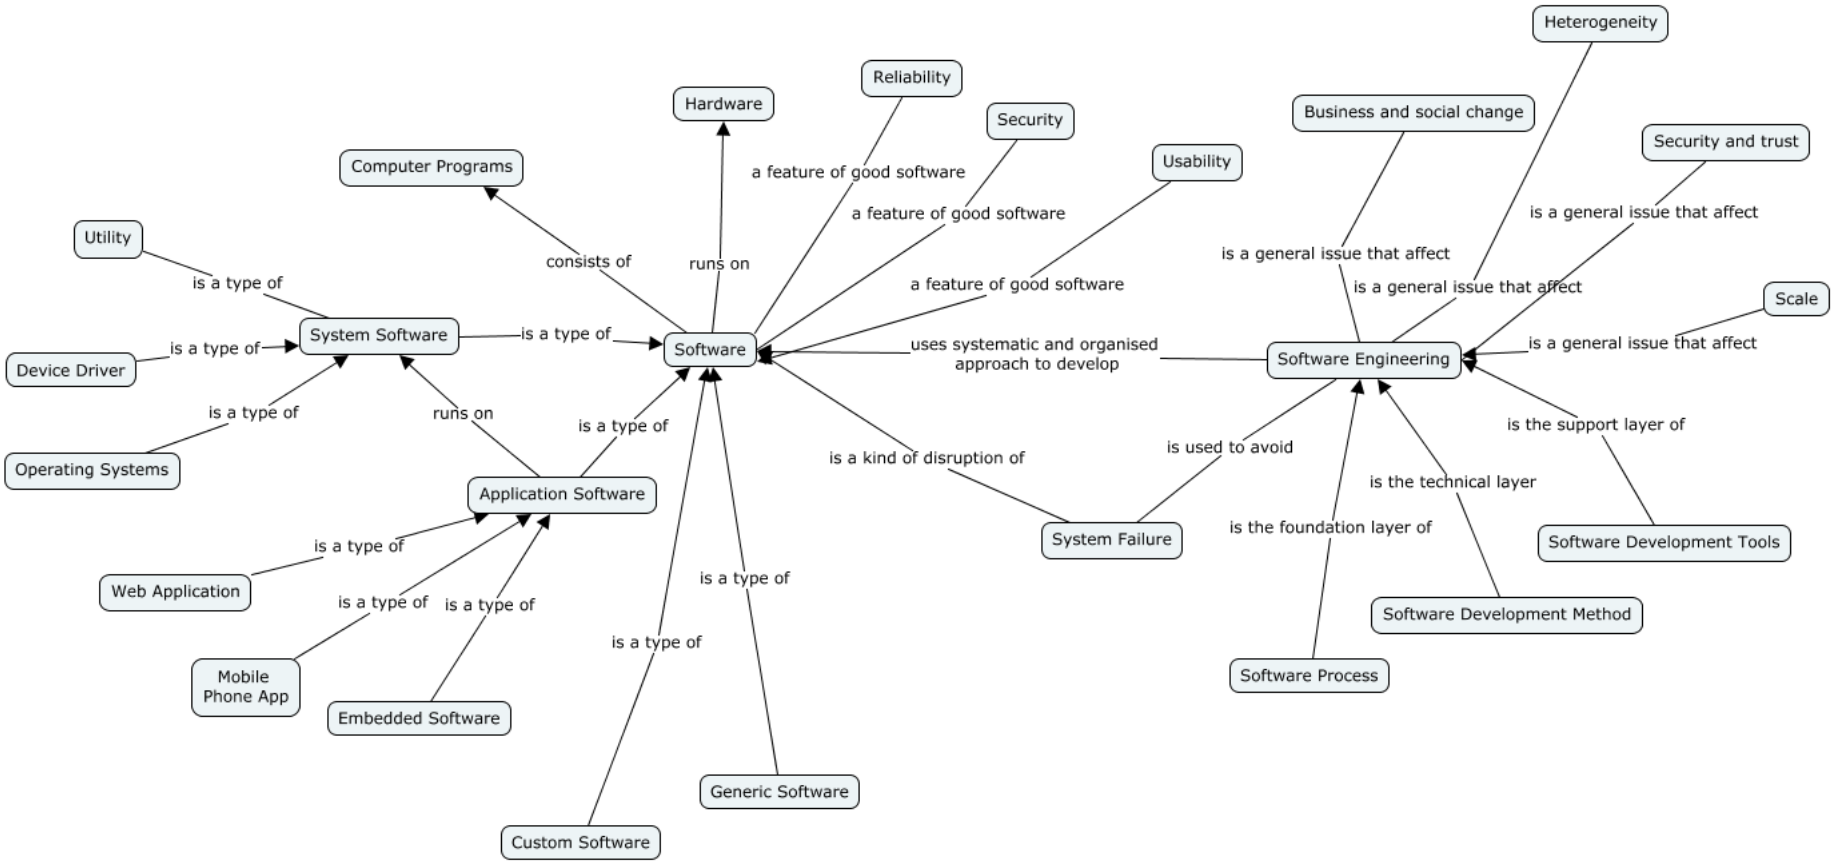

- Topic: Software Engineering

1. Identify concepts
2. Add links to show the relationship

Concept Map example

Concept Map example: Software and Software Engineering

Exercise

Draw a concept map of the topic "Software Processes"

- You can use paper or any tool
- You may work in small groups
